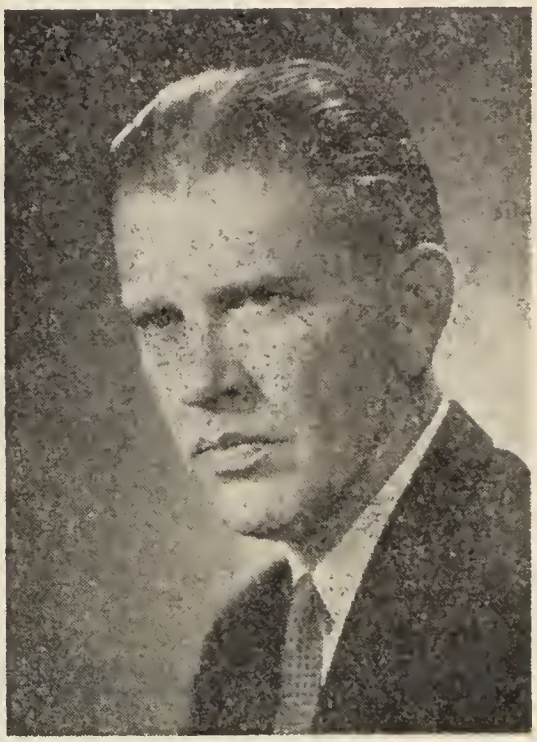
ONCE again this year there is presented for auction several numismatically attractive groups of coins. Included are rarities, standard issues and more than a few lots of moderately valued coins for the collector who wants to start a new series.



Of particular note in this catalog is the HOWARD COLLECTION OF SONORA, a specialized group covering the mints of Alamos and Hermosillo. These coins are listed in their normal order within the larger section covering Mexico.

Of equal stature is the GARBER COLLECTION OF AUSTRALIA, which includes almost every bronze and silver coin issued with the exception of a few minor die varieties. Two rare 1930 pennies are offered.

Other consignments covering many areas in the world are completed by the nice selection of United States coins. Special attention should be given to the choice silver which is highlighted by one of the finest 1901-S quarters up for auction in a long time.

The sale will be held in our newly enlarged offices which are planned for this use. In order to anticipate the number who will be here for each session, we would appreciate word from you if you will attend. The Hudson Tubes (PATH) to **Hoboken,** or the No. 63 bus from the Port Authority Terminal will bring you within a few steps of the building.

HOW AN AUCTION SALE WORKS

Perhaps you have wondered just how my auction sales of coins really work. If you have, this is what happens.

A large collection or a group of small collections are consigned by their owners to be sold at the best prices possible. Then the coins are assembled in a reasonable order, making lots of one or more coins, as I determine the buyer will prefer. The lots are then catalogued and described, sensible valuations are established and photographs are made for some of the outstanding pieces and those which are impossible to describe satisfactorily with words alone. When mounted, the photographs are sent to the photo–engraver for the preparation of plates to be used by the printer. Several thousand catalogs are printed and mailed to prospective buyers. Each catalog has a BID SHEET for the buyer to use, along with a return envelope.

When the BID SHEETS are received they are numbered in the order of their receipt and the bids posted in a master BID BOOK. On the date of the sale, the BID BOOK is checked and the high bidder on each lot has his bid – **starting at a normal advance over the second high bid** – offered against the floor bidders at the public sale. In a case where equal bids are received, the first bidder wins the lot. Therefore it follows that a mail bidder will receive the lot if a floor bidder does not exceed his bid by the normal advance.

Valuations are estimates of the value of each lot. They are sometimes less than catalog values because of condition. Often they are the standard catalog. Frequently they are higher or much higher than catalog values because current markets for these particular pieces far exceed the values given in available reference works.

A final word – the offering of ridiculously low bids that are only 10% to 20% of the estimate of value is a waste of my time and the bidder's time. They can only result in no more catalogs being sent to such individuals. Life is too short to bother with this type.

Govern yourself accordingly, and do enjoy this great hobby.
